Subject: REMINDER: 100-Day Supply Prescription Drug Benefit

Inland Empire Health Plan (IEHP) would like to remind our valued pharmacy partners that most chronic medications are covered up to a 100-day supply at a time.

IEHP is committed to supporting our members in maintaining strong medication adherence, especially for chronic conditions such as diabetes, hypertension, and hyperlipidemia. We are reminding all network pharmacies of the importance of dispensing 100-day supplies whenever appropriate and permitted.

Increasing access to a 100-day supply of medication improves medication adherence, reduces the refill burden for members, and helps maintain continuity of care.

Please consider the following recommendations:

- **Proactively converting** eligible chronic maintenance medications to **100-day supplies** when allowed/permitted, and updating day-supply quantities when prescriber clarification is needed.
- **Communicating with prescribers promptly** when prescriptions require modification to support 100-day fills, including discontinuing previous shorter-day-supply scripts.
- **Educating members** on the benefits of longer supplies of medication, fewer trips to the pharmacy, reducing missed refills, and improved continuity of care.

Your cooperation helps ensure members receive the full benefit of their medication therapy.

Thank you for your continued partnership and support.
