

The U.S. Healthy People 2030 goal is to protect 80% of teens with the HPV cancer prevention vaccine, but only 56.7% of children are up to date per 2023 data. The American Cancer Society (ACS) invites community health centers, pediatric practices, and family practice medical groups to join a no-cost program to close adolescent vaccination care gaps and improve clinical processes. Together, we can help prevent over 37,000 cancers a year.

The ACS is proud to introduce the 2025 HPV Vaccination Health System Learning Community, a dynamic initiative aimed at increasing HPV vaccination rates among adolescents aged 9-13 in select states. Members of this cohort will dive into evidence-based interventions, unlock data-driven strategies, explore cutting-edge quality improvement (QI) practices, and engage in meaningful discussions with peers to make a real impact. Join us on this exciting QI journey!

Participation Benefits

Health systems will have the opportunity to:

- Implement QI tools & evidence-based interventions
- Learn about the latest scientific evidence
- Network with peer organizations
- Engage in a culture of continuous QI
- Explore ACS & HPV Roundtable resources & materials
- Receive up to 1.0 CME/CNE educational credit for each session (*not including the info session*)
- Earn an ACS Certificate of Completion

Participation Criteria

Enrollment for this program is limited to the 12 states with the largest adolescent populations, which include:

California, Florida, Georgia, Illinois, Michigan, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Texas, and Virginia.

This program is designed to focus on the following systems:

- Community health centers/FQHCs
- Primary care integrated delivery systems
- Family practice groups
- Pediatric medical groups

Organizations will commit to:

- **Actively engage** in learning sessions
- **Share** best practices with cohort
- **Create** an HPV vaccination QI Team
- **Draft** a QI action plan
- **Provide** data on adolescent vaccinations

Learning Objectives

1. Review HPV-related cancer trends and vaccination rates.
2. Discuss evidence-based strategies to encourage on-time vaccination, avoid missed opportunities, and enhance vaccine uptake.
3. Summarize how to address barriers to HPV vaccination, including vaccine hesitancy, access issues, and clinical workflows.
4. Describe how to promote collaboration between healthcare providers, public health practitioners, and community organizations.
5. Review how to access ACS and ACS National HPV Vaccination Roundtable resources to support HPV vaccination efforts.

Sessions Details

This series is scheduled on the following dates:

- **Info Session:** April 24th
- **Session 1:** May 22nd
- **Session 2:** July 24th
- **Session 3:** September 25th
- **Session 4:** October 23rd
- **Session 5:** December 11th

CME/CNE credit will be provided for all sessions, except the info session. Full accreditation details will be provided prior to each live session.

Time:

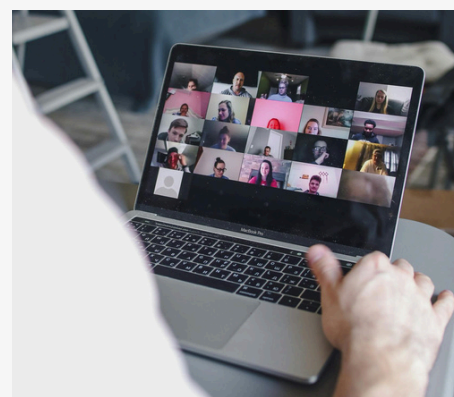

2pm - 3pm EST

Cost:

Free to attend

Location:

Zoom

Registration Info

Join the info session to learn more about this educational opportunity, ask questions, and become a member of this cohort!

Register [here](#) or scan the QR code.

Register for the info session to gain access to the registration for the series.
