Subject: **REMINDER: Provision of Dialysis Bundle Drugs**

Certain drugs used in dialysis treatment are to be provided directly to our members by the dialysis center. As a reminder, reimbursement for these medications has been included in the dialysis case rate; therefore, separate billing and payment to pharmacies should not be made for these drugs, unless your contract with IEHP explicitly states otherwise.

We encourage the dialysis centers in our network to remain committed to serving as the central point of provision for dialysis bundle drugs for members in need of this treatment. This policy is in accordance with the Centers for Medicare & Medicaid Services (CMS) guidance, and additional information can be found on the CMS website [click here](#).

Ensure the medications listed below are administered as part of the comprehensive care provided to our members receiving dialysis within our network. Please also refer to your organization’s contract terms and rates.
