Subject: **REMINDER: Member Eligibility Now Includes SOGI Data!**

Collecting **Sexual Orientation and Gender Identity (SOGI)** data allows important health care services to be delivered, such as appropriate preventive screenings, assessments of risk for sexually transmitted diseases and HIV, discussions about parenting, and effective interventions for behavioral health concerns that can be related to any experiences with anti-LGBTQIA+ stigma.

Now Available!

Member Health Equity Demographics can be accessed during eligibility verification, provided that this data is available and the Member consented to share this information with providers:

1. Input the member's IEHP ID
2. Once results appear, click the member's name
3. If data is available, the member's SOGI data will appear under **Sexual Orientation/Gender Identity**

SOGI data includes sex assigned at birth, sexual orientation, gender identity, preferred pronoun and name, sourced directly from Members or their authorized representative.

Utilizing this information may help reduce health care disparities, develop targeted initiatives to improve the quality of care, and provide patient-centered care. Thank you for your partnership in supporting optimal health.
