

Care for Children With Serious Illnesses MyPath Program

What is MyPath?

A no-cost program that provides extra support to you and your child to help cope with serious medical conditions.

If your child qualifies, MyPath may be right when:

- A health decline occurs
- Usual treatments are not working or become harder
- More home-based support is needed

Our MyPath team can provide supportive services to address all your child's physical, mental, social, emotional and spiritual needs.

With extra support from your care team, your child and family can improve quality of life and comfort at home.

Support For You and Your Child

The MyPath care team consists of a doctor, a nurse, a social worker and other providers. Your child's doctor works with other providers to help:

- Manage your child's pain and symptoms
- Answer questions about your child's illness, medicines and treatments
- Avoid unnecessary emergency department visits by giving needed care at home or in the clinic.

Ease Your Child's Distress

Get counseling services when your child is feeling down. If needed, a social worker and a chaplain are on hand.

Access More Services

Along with full benefits, your child gets more services like:

- A personal care plan
- Care coordination
- Guidance through the medical system

Get Needed Support, 24/7

Your child will never be alone with MyPath. The care team offers 24/7 support by phone.

Find Out If Your Child Is Eligible

Set up an in-home meeting to see if MyPath is right for your child.

Get Started

Call IEHP Member Services or ask your child's primary care doctor for a MyPath consultation.
